

Aims and Objectives

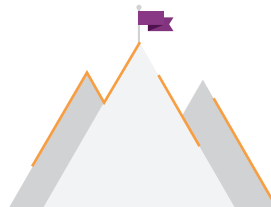

The training procedures for in-service educators are not always accurate regarding their actual needs, or easy to be organized without taking them out of their classrooms.

SIA-ProD aims to provide practitioners with the methodology and the instruments for self-evaluation and self-improvement at a 'low cost' way.

Outcomes

To achieve this goal, the project will implement to the educational field an innovative technique named Discrete Choice Modeling (DCM). By implementing the DCM method in Early Childhood Education and Care (ECEC), the project will develop a self-assessment tool (Teacher Self-Assessment Assistant – TSAA) and a self-improvement educational package (SIEP) to investigate and in turn to support the way early childhood educators promote physical activities in their classroom.

Further Information

For joining the project as a participant during the main study or to get more information about the project visit the project website.
